

PATHOSEAL 95

SAMPLE TRANSPORT BAG RANGE

COMPONENT
PACKAGING

The PathoSeal 95 flexible secondary range is designed and tested to withstand a pressure difference of 95 kPa to meet Category B transport regulations. They are leak-proof and suitable to hold a wide range of primary containers, such as blood vials, sample containers, swabs, blood collection bags and medical devices.

The PathoSeal range feature a simple closure system enabling ease of packing, plus the unique tamper evident seal ensures the integrity of samples.

In addition the bags are sequentially numbered, providing a chain of custody and additional security. An external document pouch is also a feature of the pouches for all sizes with the exception of the PathoSeal 95 A6.

THIS PRODUCT CAN BE USED FOR

- Diagnostic samples
- Category B, Infectious Substances
- Clinical trials
- Screening Programmes
- Eradication schemes

FEATURES

- Suitable for use within Category B solutions
- Tamper evident seal
- Sequentially numbered for sample traceability
